1. Introduction

1.1 Document Purpose

This document outlines the business requirements for developing a web-based platform that connects individuals in need with volunteers, NGOs, and donors. It defines the scope, functional and non-functional requirements, business rules, and constraints.

1.2 Project Background

Disabled students often face challenges in finding writers/scribes during exams, leading to stress and unfair disadvantages. Similarly, old-age homes and orphanages struggle to attract volunteers and resources. A centralized digital platform is needed to facilitate secure, verified, and user-friendly interactions among students, volunteers, NGOs, and donors.

1.3 Project Goals

- Enable disabled students to request and connect with verified writers/scribes.
- Build a network of volunteers and donors supporting social causes.
- Support NGOs by listing their needs and volunteer opportunities.
- Establish a transparent and trustworthy social support ecosystem.

1.4 Customers and Stakeholders

Customers:

- Disabled students
- Volunteer writers and service volunteers
- Donors and social contributors
- NGOs, old-age homes, orphanages

Stakeholders:

- Educational institutions and exam authorities
- Social welfare organizations
- Platform administrators
- Government support services

2. Business Requirements Overview

The platform will be web-based and accessible across devices.

- Three user roles: **User**, **Volunteer**, and **Admin**.
- Users can register and request scribes for exams.
- Volunteers can register to assist users or NGOs.
- NGOs can post donation needs and volunteer requests.
- Admins manage users, system security, verification, and operations.
- The system must support secure communication and fast response times.

3. Functional Requirements Overview

3.1 User Module

- Register and create an account
- Request scribes/writers for scheduled exams
- Search volunteers by location and availability
- Receive notifications for request updates
- Provide ratings and feedback
- Raise support needs beyond exams

3.2 Admin Module

- Verify registrations of students, volunteers, and NGOs
- Manage database, reports, user records, and complaints
- Monitor donations, response times, and activity logs
- Handle emergency support requests
- Ensure privacy and system performance

3.3 Volunteer/Writer Module

- Register and submit verification documents
- List availability and preferred work location
- Accept or decline student requests
- View assistance history
- Receive notifications for new requests

4.Non-Functional Requirements

- Secure, scalable, and user-friendly system
- Accessibility features for disabled users
- Fast processing and real-time notifications
- Multi-device support: desktop, tablet, mobile
- Data encryption and privacy compliance
- Clean, responsive, and intuitive interface
- Support for concurrent multi-user access
